MAGMA FIRE HELMET

Bullard

SAFETY. SINCE 1898.™

The new Magma fire helmet platform concept

Choose your personalized Magma from two unique configurations, Type A (half size shell) or Type B (three-quarter size shell) with a unified look

- Sleek design accommodates a wide variety of accessories and electronic components
- Can be easily reconfigured for new applications
- Superior comfort in its class
- Easy to clean due to easy disassembly

*Helmet type A and B according to EN443:2008

The layout of the platform, outer shell and visor encloses the inner compartment against external risks.

No comparable helmet offers a similar protection against heat, flames, sparks and fluids.

The Magma head ring is made from just three components. Clearly laid out and easy to operate.

The front and rear height of the head ring can be adjusted separately, just like the wearing height.

These functions ensure sufficient space for a perfect fit of the protective goggles.

Strap system with 4-point attachment, adjusts itself automatically. Easy adjustment even with gloves on. The x-shaped design of the neck straps fits comfortably and obtains best results in pull off test.

The large protective outer visor offers a maximum upper and lateral field of view, while also covering the complete face up to the chin, leaving enough space for spectacles, protective goggles and even a respirator mask.

The helmet is compatible with all conventional respirator masks – whether with rubber straps or adjustable two-point mask connection.

Radio with bone or swan microphones can be integrated and mounted in no time to the designated attachment points without using tools.

Lighting

By intention Bullard decided not to go with a torch model orientated system due to the fast evolvement of the LED technology and the large variety of requirements.

The newly developed torch adapter from Bullard can accomodate most types of torches.

The adapter is attached to the ergonomical position: below the eye line, for a low-reflection illumination even in intensive smoke conditions and also for a low centre of gravity.

Neck protector

Neck protector made from Nomex or aluminized aramid fiber with inner layer. „Dutch“ Ear-Neck-Protector 2-layer version or 4-layer version with watertight membrane.

Colors and Ranking

Magma offers a huge range of colors and color combinations as well as various options for ranking by colors, logos and text on the front frame „beneath the visor“ or on the outer shell.

- modular platform concept
- optional bi-colour design
- largest protection zone
- designed to prevent from view and hearing restrictions
- largest visor, full face protection
- full inside insulation against hazards
- multiple adjustments for perfect fit
- universal light adaption
- only 29 components for easy handling, maintenance, cleaning and low lifetime costs
- no fix life time limitation
